<sup>1</sup> These options are no longer available to new investors.

\* The fund size is only calculated on a six monthly basis as at 30 June and 31 December each year. (The Fund balances mentioned above are as on 31 December 2023).

Notes for investment performance:

Returns can go up and down. Past performance is not necessarily indicative of future performance.

Performance figures (returns) are based on the unit prices as at the date quoted, which are calculated net of investment management fees and taxes (but exclude all other fees). Returns are assumed to be reinvested. Returns are only provided where the investment option was offered through this product for the whole of the specified period.

This information has been prepared for general information only, not having regard to any person's objectives, financial situation or needs. Because of this, you should consider the appropriateness of the information having regard to your own objectives, financial situation and needs. Before making a decision to act upon any of this information, professional advice specific to your individual circumstances is recommended.

**Financial markets commentary:**

In May, the Reserve Bank of Australia kept the target interest rate at 4.35%. Unemployment rate increased to 4.0%. The Australian Dollar strengthened, closed the month up 2.42% against US Dollar at 0.665.

Australian shares rebounded in May after April retreat, driven by positive company updates. Most sectors have closed the month up. Information Technology sector was the standout outperformer, driven by positive sentiment around AI. Utilities and Finances also performed strongly. The only sector dipped during the month was Communication Services.

Global equities gained in May. US equities performed strongly, driven by strong returns from big tech stocks. In Europe, most markets have advanced. In Asia, Hong Kong and Singapore equities gained, Japanese equities was little changed and Chinese equities retreated.

In bond market, Government bonds diverged in May. US Treasury yields fell from recent highs, on the backdrop of a moderation in US inflation. US 10 Yr treasury yield decreased by 18 bps. In comparison, yields in Australia was little changed in May. 10 Yr Australia yield decreased by 1 bps.

Credit market extended steady gains in May. Default rates have been low, and investor risk appetite has been healthy. Credit spreads continue to tighten in May, in both investment grade and high yield sub-sectors.
